Lexmark™

Hospital-Grade Printers and MFPs

Business Challenge

In a hospital environment, printed information goes far beyond devices and output; it can directly impact healthcare management. For example, missing documents, offline printers and service delays can keep clinicians from providing the highest level of care to patients.

Lexmark's Advantage

With over 20 years of experience supporting healthcare customers, Lexmark builds hospital-grade printers and MFPs for the fast, reliable and accurate delivery of healthcare information. Lexmark offers a complete selection of products for both clinical and office areas certified or proven with all major EHR applications that are designed with advanced security features to meet the demands of hospital environments. For mission-critical, 24/7 clinical areas, this means users get the information they need, exactly when they need it.

Whether your goal is to improve printer uptime, increase fleet reliability or minimize clinician interventions with hardware, Lexmark hospital-grade hardware delivers measurable value from your technology investment.

Features:

Small footprint with full capacity: Save valuable space in your clinical and business areas with a multifunction product featuring a small footprint with rounded edges

Common user interface: The same tablet-like touch screen interface on all models is simple and easy for users

Metal frames and sliders: Sturdy construction is built to withstand years of heavy use

High speed input and output: One of the industry's fastest warm up and scan throughput allows users to better support patients with speedy, accurate information

Cleanable touch screen: Infection-control friendly, washable touch screen responds to a single touch, with or without gloves

Customizable interface: Easily add one-touch icons for a wide range of workflow apps to capture, route or access information

Lexmark™

Smart Color Multifunction Products

CX725 Series Smart MFPs

The CX725 series combines the capabilities and durability of a workgroup MFP with a compact design for space constrained areas and the ease of use of a personal output device. Print and copy up to 50 pages per minute in black or color, and scan at up to 60 images per minute. Excellent for areas requiring on-demand color, patient education materials and HIMSS stage 7 scanning.

CX825 Series Smart MFPs

The fastest letter/A4 format MFP in its class*, the CX825 series prints and copies up to 55 ppm and a offers a maximum monthly duty cycle of 250,000. With a 1.6 GHz quad-core processor and 2 GB of standard memory, these MFPs feature a powerful print controller to handle complex color jobs with large, high-resolution photos and graphics spanning many pages. Ideal for ER, patient admitting, on-demand color patient communications, areas requiring color laser wristbands or an eTask touch screen to access workflow apps.

X950 Series Smart MFPs

The Lexmark X950 Series delivers affordable A3 and color functionality for clinical users with easy-to-use features, productivity solutions and a compact design at speeds up to 55 pages per minute. Perfect for general back office and administrative areas, accounts payable workflow automation and HR employee onboarding workflow automation.

Smart Monochrome Multifunction Products

MX710 Series Smart MFPs

The MX710 series features workgroup-ready print speeds of up to 70 pages per minute and duplex color scanning at a class-leading** speed of up to 140 images per minute. In addition, this series has an input capacity 3,300 sheets and an optional extra high yield toner cartridge. Excellent for nursing stations, outpatient surgery areas and areas requiring tamper-resistant prescription or label printing.

MX810 Series Smart MFPs

Blaze through complex jobs with an 800MHz dual-core processor and memory that expands up to 3 GB and Gigabit Ethernet. Your first page emerges in as little as four seconds, with an input capacity of up to 2,750 sheets and an optional high yield toner cartridge. Best choice for ER, patient admitting and areas requiring label, wristband or tamper-resistant prescription printing.

MX910 Series Smart MFPs

Connected and capable, the MX910 Series takes only seconds to produce a first page, then prints up to 45-65 pages per minute. The printing mechanism supports 11 x 17 printing, and is backed by a powerful 800 MHz dual-core processor and up to 3 GB of memory to ensure fast output. Ideal for back office or administrative areas requiring 11 x 17 paper or advanced finishing options.

MX611 Series Smart MFPs

The MX611 series provides hospital-grade features in a smaller footprint at speeds up to 45 pages per minute. Print complex documents effortlessly with up to 1.2 GB of upgradable memory and a powerful 800 MHz dual-core processor. In addition, true 1200x1200 dpi resolution ensures images and graphics stay crisp. Great for nursing stations or other space-constrained areas that require reliable clinical printing and tamper-resistant prescription printing.

* Class is defined as A4 color laser MFPs priced between $4,000 and $6,000 as of November 2015. Comparison based on manufacturer's web price and published speed specifications as reported by Buyers Laboratory (BLI), as of November 2015.

** Class comparison based on large workgroup mono A4 multifunction printers priced at $2,000 or more as of January 2015
