Lexmark's Operation ReSource<sup>SM</sup> program lets you participate in a worldwide recycling effort at no cost to you.

Simply package your used print cartridge in the shipping box your new cartridge came in. Follow the instructions on the outside of the box to send the used cartridge back to Lexmark.

If a prepaid shipping label is not available for your country, contact the place where you bought your printer for additional recycling information.

**Warning:** Lexmark does not recommend refilling used printer cartridges or purchasing refilled cartridges from a third party. Print quality and printer reliability cannot be guaranteed if you do. **The printer warranty does not cover damage caused by using refilled cartridges.**
