

Generate more value from print in **Healthcare**

In a medical environment, printed information goes far beyond your printers and their output – it can directly impact patients and healthcare management. Missing documents, offline printers and service delays can keep clinicians from providing the highest level of care.

Protect against insider threats by strengthening your data security

Protecting patient health information and preventing data breaches is critical to any organization's information security plan.

Lexmark's Secure by Design approach begins at the device, which has been designed to be secure from the start, and extends to our software solutions and beyond to protect your patients' digital and paper health information.

Identify ongoing ways to save money and gain value

Continuing to revise healthcare processes is key to unlocking wider value. Something as simple as us observing how notes are jotted down or listening to clinicians can lead to improved workflows for you.

This is Lexmark's proven approach, and it's why we build long-term successful relationships with our customers – and one reason 95% of our customers renew with us.

Improve communication, no matter the patient's spoken language

Maintaining current, easy-to-understand communications is critical to improving patient well-being and satisfaction, and disruptions can keep clinicians from providing the highest level of care.

Lexmark solutions translate documents, such as discharge instructions, in real time to provide a safety net for patients who need additional language support.

Improve clinical access and patient safety with automated workflows

Integrate clinical data into your existing medical information systems using meta-tagging to improve data accuracy and patient safety.

Lexmark Healthcare Assessments provide industry best practices for placement and utilization of an output fleet while adding smart solutions to support clinical and administrative workflows.

Unlock cost and efficiency gains with a smaller footprint

Lexmark printers are engineered to flex across different healthcare environments, including small clinical areas and large emergency departments.

Cloud solutions reduce the number of devices you need and the number of pages you print, all while supporting your existing electronic medical record and ancillary systems in clinical and administrative areas.
